FOR IMMEDIATE RELEASE

SYPRIS RECEIVES AWARDS FOR SATELLITE ELECTRONICS

ASSEMBLIES TO BE USED IN CRITICAL SPACE-BASED SYSTEMS

TAMPA, FL. (September 10, 2009) – Sypris Electronics LLC, a subsidiary of Sypris Solutions, Inc., announced today that it has received approximately \$5.5 million in follow-on orders to produce electronic assemblies for multiple satellite systems. Sypris Electronics has worked for years with several of the largest space prime contractors to provide critical electronic assemblies for use in these high reliability applications.

“Sypris Electronics continues to expand the scope and capabilities of its space offerings in partnership with prime contractors for commercial and government satellite systems,” stated John Walsh, President of Sypris Electronics. “Our dedicated NASA certified space manufacturing operation supports next generation satellite systems for global communications, connectivity and other endeavors by the United States and its allied nations for both commercial and military applications.”

Sypris Electronics is a world-class, integrated systems solutions provider. Our ruggedized electronic products, advanced engineering services and complete electronic manufacturing capabilities are aligned to provide our customers the best people, practices and technologies to continually exceed expectations. We consistently promote an agile, innovative culture by strategically partnering with leading-edge technology companies, agencies and universities. With over 40 years of experience, Sypris Electronics is proud to develop, manufacture and integrate leading technologies into mission critical electronics systems that secure America's interest.
